What college/university are you currently attending? Howard University

Field of Study (Major): Computer Science

Why did you choose this field of study? I chose to major in computer science because I have always been drawn to problem-solving and building things that can make life more efficient or accessible for others. There's something empowering about learning a language that allows me to create tools, solve real-world issues, and even help others tell their stories. It's not just about code, but about its impact.
